Dublin 2013

22ND ANNUAL SCIENTIFIC MEETING

October 17-19, 2013
Chairmen: David HARRIS & Brian O'CONNELL

Preparing for the Future of Implant Dentistry

Preparing for the Future of Implant Dentistry

Dear Colleagues,
On behalf of the EAO we are very pleased and honoured to announce that the 22nd Annual Scientific Congress of the EAO will be held in Dublin, Ireland, October, 17th to 19th 2013.

The Scientific Committee has prepared a programme that will address many practical and highly relevant issues of concern to both clinicians and patients. These include the management of aesthetic challenges and strategies to enhance treatment predictability and the long-term maintenance of dental implants. The conference will also highlight the real and emerging issues that arise in a population that is ageing and which has increasingly complex needs.

As you might expect, we have invited outstanding speakers from many countries, chosen on the basis of their expertise. They will present the most compelling scientific and clinical basis for the treatment of patients, as well as addressing the latest innovations and research. We are also delighted to collaborate with industry who will provide their own satellite symposia.

Dublin is a very special historic and exciting capital city, renowned for its warm and welcoming people. The medieval, Georgian and modern architecture provides an intriguing backdrop to this cosmopolitan city, famous for its musical, theatrical and literary traditions.

The Congress will take place at the newly opened and internationally acclaimed Convention Centre Dublin situated on the river Liffey in the heart of the city with spectacular views across Dublin and its surroundings. You will have an opportunity to experience the many cultural activities and historic landmarks of the city, such as the Abbey Theatre, the Book of Kells and the Guinness Storehouse amongst others, and enjoy the extensive and varied opportunities for entertainment, good food and shopping.

The EAO Annual Congress provides a unique forum for you to meet and exchange views with colleagues from many parts of the world. It also offers an opportunity for you to present original research and clinical developments at the Congress in the form of posters, oral presentations and research competitions.

On behalf of the Board and Scientific Committee we hope you will join us for what we feel sure will prove to be an attractive, stimulating and interesting programme.

We look forward to extending a special traditional Irish Cead Mile Failte (100,000 welcomes) to EAO.
